Chemical Process Technology By Jacob A. Moulijn, Michiel Makkee, Annelies E. van Diepen

With a focus on actual industrial processes, e.g. the production of light alkenes, synthesis gas, fine chemicals, polyethene, it encourages the reader to think “out of the box” and invent and develop novel unit operations and processes. Reflecting today’s emphasis on sustainability, this edition contains new coverage of biomass as an alternative to fossil fuels, and process intensification.

The second edition includes:

- New chapters on Process Intensification and Processes for the Conversion of Biomass
- Updated and expanded chapters throughout with 35% new material overall
- Text boxes containing case studies and examples from various different industries, e.g. synthesis loop designs, Sasol I Plant, Kaminsky catalysts, production of Ibuprofen, click chemistry, ammonia synthesis, fluid catalytic cracking
- Questions throughout to stimulate debate and keep students awake!
- Richly illustrated chapters with improved figures and flow diagrams

Chemical Process Technology, Second Edition is a comprehensive introduction, linking the fundamental theory and concepts to the applied nature of the subject. It will be invaluable to students of chemical engineering, biotechnology and industrial chemistry, as well as practising chemical engineers.

From reviews of the first edition:

“The authors have blended process technology, chemistry and thermodynamics in an elegant manner... Overall this is a welcome addition to books on chemical technology.” – The Chemist

“Impressively wide-ranging and comprehensive... an excellent textbook for students, with a combination of fundamental knowledge and technology.” – Chemistry in Britain (now Chemistry World)

Editorial Review

Review

“In conclusion, this excellent textbook is highly recommended to those readers wishing to have up-to-date knowledge of the chemical industry and its processes. Organic chemists, in particular, will learn the chemical engineer’s approach to process design and process development and will appreciate the differences and hopefully understand how the methods used for bulk chemicals can be used for more complex molecules book.” (*Organic Process Research & Development*, 1 September 2014)

“The book could serve as a valuable text for lower-level chemical engineering students, but it could also be useful to professionals in biotechnology and industrial chemistry. Summing Up: Recommended. All academic, two-year technical program, and professional engineering collections.” (*Choice*, 1 December 2013)

From the Back Cover

Chemical process technology is a broad area that brings together expertise in chemical engineering, chemistry and biotechnology, as well as project management, and the economic and environmental aspects of process and product development. This book provides an essential bridge between the chemical sciences and the chemical industry.

With a focus on actual industrial processes, e.g. the production of light alkenes, synthesis gas, fine chemicals, polyethylene, it encourages the reader to think “out of the box” and invent and develop novel unit operations and processes. Reflecting today’s emphasis on sustainability, this edition contains new coverage of biomass as an alternative to fossil fuels, and process intensification.

The second edition includes:

- New chapters on Process Intensification and Processes for the Conversion of Biomass
- Updated and expanded chapters throughout with 35% new material overall
- Text boxes containing case studies and examples from various different industries, e.g. synthesis loop designs, Sasol I Plant, Kaminsky catalysts, production of Ibuprofen, click chemistry, ammonia synthesis, fluid catalytic cracking
- Questions throughout to stimulate debate and keep students awake!
- Richly illustrated chapters with improved figures and flow diagrams

Chemical Process Technology Second Edition is a comprehensive introduction, linking the fundamental theory and concepts to the applied nature of the subject. It will be invaluable to students of chemical engineering, biotechnology and industrial chemistry, as well as practising chemical engineers.

Praise for the best-selling first edition

From *The Chemist*, Summer 2003

“The authors have blended process technology, chemistry and thermodynamics in an elegant manner... Overall this is a welcome addition to books on chemical technology.”

From *Chemistry in Britain* (now *Chemistry World*), July 2001

“Impressively wide-ranging and comprehensive... an excellent textbook for students, with a combination of fundamental knowledge and technology.”

About the Author

JACOB A. MOULIJN, MICHIEL MAKKEE and ANNELIES E. VAN DIEPEN

Users Review

From reader reviews:

Jean Smith:

With other case, little men and women like to read book Chemical Process Technology. You can choose the best book if you'd prefer reading a book. As long as we know about how is important any book Chemical Process Technology. You can add understanding and of course you can around the world by a book. Absolutely right, since from book you can realize everything! From your country right up until foreign or abroad you may be known. About simple factor until wonderful thing you can know that. In this era, we are able to open a book or even searching by internet device. It is called e-book. You should use it when you feel bored to go to the library. Let's learn.

Charlotte Gambrel:

This Chemical Process Technology book is simply not ordinary book, you have after that it the world is in your hands. The benefit you have by reading this book is usually information inside this guide incredible fresh, you will get data which is getting deeper a person read a lot of information you will get. This kind of Chemical Process Technology without we comprehend teach the one who reading it become critical in considering and analyzing. Don't always be worry Chemical Process Technology can bring once you are and not make your handbag space or bookshelves' grow to be full because you can have it in the lovely laptop even telephone. This Chemical Process Technology having great arrangement in word as well as layout, so you will not experience uninterested in reading.

Raymond Dahms:

Information is provisions for people to get better life, information presently can get by anyone from everywhere. The information can be a information or any news even a huge concern. What people must be consider any time those information which is in the former life are challenging to be find than now is taking seriously which one would work to believe or which one the resource are convinced. If you obtain the unstable resource then you obtain it as your main information you will see huge disadvantage for you. All those possibilities will not happen with you if you take Chemical Process Technology as the daily resource information.

Nicole Norris:

You can get this Chemical Process Technology by look at the bookstore or Mall. Merely viewing or reviewing it may to be your solve difficulty if you get difficulties to your knowledge. Kinds of this e-book are various. Not only through written or printed but also can you enjoy this book through e-book. In the modern era including now, you just looking of your mobile phone and searching what your problem. Right now, choose your personal ways to get more information about your book. It is most important to arrange yourself to make your knowledge are still upgrade. Let's try to choose correct ways for you.
