You will also need a course ID from your instructor to access MyMathLab Global.

ESSENTIAL MATHEMATICS FOR ECONOMIC ANALYSIS

Fifth Edition

An extensive introduction to all the mathematical tools an economist needs is provided in this worldwide bestseller.

“The scope of the book is to be applauded” **Dr Michael Reynolds, University of Bradford**

“Excellent book on calculus with several economic applications” **Mauro Bambi, University of York**

New to this edition:

- The introductory chapters have been restructured to more logically fit with teaching.
- Several new exercises have been introduced, as well as fuller solutions to existing ones.

- More coverage of the history of mathematical and economic ideas has been added, as well as of the scientists who developed them.
- New example based on the 2014 UK reform of housing taxation illustrating how a discontinuous function can have significant economic consequences.
- The associated material in MyMathLab has been expanded and improved.

Knut Sydsaeter was Emeritus Professor of Mathematics in the Economics Department at the University of Oslo, where he had taught mathematics for economists for over 45 years.

Peter Hammond is currently a Professor of Economics at the University of Warwick, where he moved in 2007 after becoming an Emeritus Professor at Stanford University. He has taught mathematics for economists at both universities, as well as at the Universities of Oxford and Essex.

Arne Strom is Associate Professor Emeritus at the University of Oslo and has extensive experience in teaching mathematics for economists in the Department of Economics there.

Andrés Carvajal is an Associate Professor in the Department of Economics at University of California, Davis.

Users Review

From reader reviews:

Lucille Chenier:

Do you have favorite book? Should you have, what is your favorite's book? Publication is very important thing for us to find out everything in the world. Each reserve has different aim or goal; it means that publication has different type. Some people experience enjoy to spend their a chance to read a book. They can be reading whatever they get because their hobby is usually reading a book. How about the person who don't like reading through a book? Sometime, individual feel need book if they found difficult problem as well as exercise. Well, probably you'll have this Essential Mathematics for Economic Analysis (5th Edition).

Elton Williams:

The book Essential Mathematics for Economic Analysis (5th Edition) give you a sense of feeling enjoy for your spare time. You can use to make your capable much more increase. Book can to be your best friend when you getting anxiety or having big problem with the subject. If you can make reading through a book Essential Mathematics for Economic Analysis (5th Edition) to become your habit, you can get far more advantages, like add your current capable, increase your knowledge about a few or all subjects. You are able to know everything if you like available and read a publication Essential Mathematics for Economic Analysis (5th Edition). Kinds of book are several. It means that, science guide or encyclopedia or other people. So , how do you think about this publication?

Daniel Caudle:

Your reading 6th sense will not betray an individual, why because this Essential Mathematics for Economic Analysis (5th Edition) e-book written by well-known writer whose to say well how to make book which might be understand by anyone who also read the book. Written in good manner for you, still dripping wet every ideas and publishing skill only for eliminate your hunger then you still doubt Essential Mathematics for Economic Analysis (5th Edition) as good book not just by the cover but also through the content. This is one reserve that can break don't assess book by its deal with, so do you still needing an additional sixth sense to pick this particular!?! Oh come on your reading through sixth sense already said so why you have to listening to an additional sixth sense.

Nancy Bowers:

As a scholar exactly feel bored in order to reading. If their teacher questioned them to go to the library or to make summary for some book, they are complained. Just small students that has reading's heart or real their leisure activity. They just do what the professor want, like asked to go to the library. They go to at this time there but nothing reading significantly. Any students feel that reading is not important, boring as well as can't see colorful pics on there. Yeah, it is being complicated. Book is very important to suit your needs. As we know that on this time, many ways to get whatever we want. Likewise word says, ways to reach Chinese's country. Therefore , this Essential Mathematics for Economic Analysis (5th Edition) can make you feel more interested to read.
