Modern Geometry ? Methods and Applications: Part I: The Geometry of Surfaces, Transformation Groups, and Fields (Graduate Texts in Mathematics) By B.A. Dubrovin, A.T. Fomenko, S.P. Novikov

This is the first volume of a three-volume introduction to modern geometry which emphasizes applications to other areas of mathematics and theoretical physics. Topics covered include tensors and their differential calculus, the calculus of variations in one and several dimensions, and geometric field theory. This new edition offers substantial revisions, and the material is written in concrete language with terminology acceptable to physicists.

Editorial Review

Users Review

From reader reviews:

Ivory Hughes:

Have you spare time for just a day? What do you do when you have much more or little spare time? That's why, you can choose the suitable activity intended for spend your time. Any person spent their spare time to take a wander, shopping, or went to the actual Mall. How about open or even read a book allowed Modern Geometry ? Methods and Applications: Part I: The Geometry of Surfaces, Transformation Groups, and Fields (Graduate Texts in Mathematics)? Maybe it is being best activity for you. You already know beside you can spend your time with your favorite's book, you can smarter than before. Do you agree with their opinion or you have other opinion?

Edward Torres:

Your reading 6th sense will not betray anyone, why because this Modern Geometry ? Methods and Applications: Part I: The Geometry of Surfaces, Transformation Groups, and Fields (Graduate Texts in Mathematics) book written by well-known writer we are excited for well how to make book which can be understand by anyone who also read the book. Written inside good manner for you, dripping every ideas and composing skill only for eliminate your personal hunger then you still question Modern Geometry ? Methods and Applications: Part I: The Geometry of Surfaces, Transformation Groups, and Fields (Graduate Texts in Mathematics) as good book not simply by the cover but also by content. This is one reserve that can break don't ascertain book by its include, so do you still needing one more sixth sense to pick this kind of!? Oh come on your reading through sixth sense already told you so why you have to listening to a different sixth sense.

Luis Morales:

The book untitled Modern Geometry ? Methods and Applications: Part I: The Geometry of Surfaces, Transformation Groups, and Fields (Graduate Texts in Mathematics) contain a lot of information on that. The writer explains her idea with easy method. The language is very straightforward all the people, so do definitely not worry, you can easy to read the item. The book was compiled by famous author. The author gives you in the new period of literary works. You can actually read this book because you can read on your smart phone, or model, so you can read the book inside anywhere and anytime. In a situation you wish to purchase the e-book, you can open their official web-site and also order it. Have a nice go through.

Richard Chambers:

As a student exactly feel bored to help reading. If their teacher asked them to go to the library or make summary for some e-book, they are complained. Just small students that has reading's heart or real their leisure activity. They just do what the trainer want, like asked to the library. They go to right now there but nothing reading really. Any students feel that reading is not important, boring along with can't see colorful pics on there. Yeah, it is to become complicated. Book is very important for yourself. As we know that on this age, many ways to get whatever we really wish for. Likewise word says, many ways to reach Chinese's country. So , this Modern Geometry ? Methods and Applications: Part I: The Geometry of Surfaces, Transformation Groups, and Fields (Graduate Texts in Mathematics) can make you really feel more interested to read.
