Science and Technology for the Conservation of Cultural Heritage From CRC Press

From 2nd to 5th October 2012 an International Congress on Science and Technology for the conservation of Cultural Heritage was held in Santiago de Compostela, Spain, organized by the Universidade of Santiago de Compostela on behalf of TechnoHeritage Network. The congress was attended by some 160 participants from 10 countries, which presented a total of 145 contributions among plenary lectures, oral, and poster communications. The congress was dedicated to eight topics, namely (1) Environmental assessment and monitoring (pollution, climate change, natural events, etc.) of Cultural Heritage; (2) Agents and mechanisms of deterioration of Cultural Heritage (physical, chemical, biological), including deterioration of modern materials used in Contemporary Art and information storage; (3) Development of new instruments, non invasive technologies and innovative solutions for analysis, protection and conservation of Cultural Heritage; (4) New products and materials for conservation and maintenance of Cultural Heritage; (5) Preservation of industrial and rural heritage from the 19th and 20th centuries; (6) Security technologies, Remote sensing and Geographical Information Systems for protection and management of Cultural Heritage; (7) Significance and social value of Cultural Heritage; and (8) Policies for conservation of Cultural Heritage.

This volume publishes a total of ninety-three contributions which reflect some of the most recent responses to the challenge of cultural assets conservation.

Editorial Review

About the Author

Holder of a PhD in History (Prehistory and Archaeology) and an Extraordinary Doctorate Award from the University of Seville, Miguel Angel Rogerio-Candelera has been a professional archaeologist for several years and, since 1999, has worked for the Instituto de Recursos Naturales y Agrobiología de Sevilla of the Spanish Council for Scientific Research (CSIC), investigating biodeterioration and non-invasive recording of Cultural Heritage, particularly rock art. He has conducted research on several painted tombs of Roman and Etruscan necropolises and at some Portuguese and Spanish rock art sites, including the Altamira Cave.

Users Review

From reader reviews:

Robert Marshall:

What do you about book? It is not important together with you? Or just adding material if you want something to explain what your own problem? How about your extra time? Or are you busy particular person? If you don't have spare time to try and do others business, it is make you feel bored faster. And you have free time? What did you do? Every person has many questions above. They need to answer that question mainly because just their can do that will. It said that about reserve. Book is familiar in each person. Yes, it is appropriate. Because start from on jardín de infancia until university need that Science and Technology for the Conservation of Cultural Heritage to read.

Mary Barnett:
