Editorial Review

From Library Journal

This book addresses the generation-old question of why the Japanese are so successful in business. The authors, professors of management at Hitotsubashi University, contend that Japanese firms are successful because they are innovative, that is, because they create new knowledge and use it to produce successful products and technologies. They identify two types of organizational knowledge: explicit knowledge, contained in procedures and manuals, and tacit knowledge, learned only by experience. U.S. managers tend to focus on explicit knowledge and stress approaches such as benchmarking, while the Japanese focus on tacit knowledge. Using corporate examples such as Honda, NEC, Nissan, 3M, and GE, the authors provide insights that reveal how to blend the best of both worlds. This scholarly volume is highly recommended not only for academics (especially in organizational theory) but also for readers doing business in and with Japan. Joseph W. Leonard, Miami Univ., Oxford, Ohio

Review

"A fascinating, exciting exposure to a new way of thinking about the knowledge-based company....Provides a model of knowledge creation that will be a touchstone of future work in this field....This important, imaginative book will challenge and intrigue managers and management scholars alike."--D. Eleanor Westney, MIT Sloan School of Management in the *Sloan Management Review*

"A fascinating volume that will interest philosophers, managers, and more common readers....The analyses are so thorough that they make the one- and two-page descriptions in Forbes magazine seem like elementary fairy stories. The authors have done their research well and provide delightful details."--*Minneapolis Star Tribune*

"Knowledge creation is to the 90s what excellence was to the 80s. I can't imagine a better book on organizational design for innovation. Nor can I imagine a better common focus for managers and scholars. This is the best and most original blend of organizational theory and practice we are likely to see for some time."--Karl E. Weick, University of Michigan School of Business Administration

"This is the most creative book on management to come out of Japan. The same authors who introduced the *rugby* approach to new product development, now bring us a myriad of new concepts: *tacit* knowledge, the oneness of *mind* and *body*, *middle-up-down* management, *hypertext* organization, to name a few. The insights for this book originated in Japan, but the managerial implications are universal. It is a must read for managers competing in the borderless world."--Kenichi Ohmae, Ohmae & Associates

"Nonaka and Takeuchi take on a subject that is truly on the frontier of management: the process by which

companies learn and create competitively valuable knowledge. What is refreshing about this book is that Nonaka and Takeuchi go beyond the slogans that have characterized much of the previous work on this subject, and delve into the specific organization structures and processes involved in organizational creativity and learning. They bring a wealth of specific, in-depth company evidence to bear on the task. The result is an important book which will advance both the literature as well as corporate practice."--Michael E. Porter, C. Roland Christensen Professor of Business Administration, Harvard University

From the Back Cover

Two leading Japanese business experts, Ikujiro Nonaka and Hirotaka Takeuchi, are the first to tie the performance of Japanese companies to their ability to create new knowledge and use it to produce successful products and technologies. In *The Knowledge-Creating Company*, Nonaka and Takeuchi provide an inside look at how Japanese companies go about creating this new knowledge organizationally. The authors point out that there are two types of knowledge: explicit knowledge, contained in manuals and procedures, and tacit knowledge, learned only by experience, and communicated only indirectly, through metaphor and analogy. U.S. managers focus on explicit knowledge; the Japanese, on the other hand, focus on tacit knowledge. And this, the authors argue, is the key to their success - the Japanese have learned how to convert tacit into explicit knowledge. To explain how this is done - and illuminate Japanese business practices as they do so - the authors range from Greek philosophy to Zen Buddhism, from classical economists to modern management gurus, illustrating the theory of organizational knowledge creation with case studies drawn from such firms as Honda, Canon, Matsushita, NEC, Nissan, 3M, GE, and even the U.S. Marines. In addition, the authors show that, to create knowledge, the best management style is neither top-down nor bottom-up, but rather what they call "middle-up-down", in which the middle managers form a bridge between the ideals of top management and the chaotic realities of the frontline. As we make the turn into the twenty-first century, a new society is emerging. Peter Drucker calls it the "knowledge society", one that is drastically different from the "industrial society", and one in which acquiring and applying knowledge will become key competitive factors. Nonaka and Takeuchi go a step further, arguing that creating knowledge will become the key to sustaining a competitive advantage in the future. Because the competitive environment and customer preferences change constantly, knowledge perishes quickly. With *The Knowledge-Creating Company*, managers have at their fingertips years of insight from Japanese firms that reveal how to create new knowledge organizationally, and how to exploit it to make successful products, services, and systems.

Users Review

From reader reviews:

Sharon Hollars:

The book *The Knowledge-Creating Company* (Harvard Business Review Classics) make one feel enjoy for your spare time. You should use to make your capable much more increase. Book can to be your best friend when you getting anxiety or having big problem with the subject.
