Quantum Physics, Near Death Experiences, Eternal Consciousness, Religion, and the Human Soul By William Joseph Bray

Written by a Physicist with 20 years in Neuro-science Medical Research who has experienced numerous medically documented NDEs. The book describes how and why reality, this Universe, is interdependent with consciousness in order to exist. Beginning with the founders of Quantum Physics, Bray describes in detail how we interact with, manipulate and define the finite Universe. We “Paint the Universe into Being”, as Bray says based on the hard data which has been proven as correct through a century of quantum research. Contrary to the concepts of many physicists and neuroscientists who consider consciousness as emerging from the physical brain, Bray describes consciousness creates the physical brain which being finite, ends, while consciousness remains. This consciousness is unique for each individual and will remain so. He also identifies in philosophy and religion the truths that are permanent through centuries, if you extract them from myth and dogma. Through this, many paradoxes in physics, religions and philosophy are eliminated. Bray shows that contrary to cognitive belief systems which change day by day, Faith is being aware that one exists as a tangible, unique and real infinite being in an eternal consciousness in which we totally focus when we die, or when we have a Near Death Experience. He has studied it not only as a physicist and neuroscientist, but as a unique experimenter: he is a rarity who has had many near-death experiences, many medically documented, due to an unknown medical condition which caused his death many times. He also proves through physics how our consciousness must be eternal in order to exist. In fact, even while we are experiencing this short, finite, physical life, we are at the same time existing in the eternal consciousness, only that we are not aware of it, because we are focusing in this finite Universe observation. The purpose is not to “prove” God, but to show that each of us is a unique individual consciousness that exists beyond space-time, for infinity. The book is not going to be ‘easy’ to read, so don’t expect it to be so. You will probably need to read it more than once. The text is high work-high payoff. There are no ‘claims’ or ideological arguments that are not backed up with solid mathematical axioms and unambiguous empirical data that is not open to speculation. The subjects covered are those listed in the title. The text: Teaches the subject of Quantum Physics to the lay reader in math and terminology that is simple to understand. describes

how and why reality, this Universe is interdependent with consciousness in order to exist, as defined by the founders of Quantum Physics over half of a century ago, to describe this mechanism in detail, how we interact with, manipulate, and define this finite Universe. To describe how we 'Paint the Universe into Being' in a tangible argument, without metaphor, ambiguity, or uncertainty that is suitable within the formal definitions of Quantum Physics as well as the philosophies and Religions of Man. To present a working definition for consciousness that is suitable to the formal definitions of Quantum Physics as well as the philosophies and Religions of Man. To establish that this definition for consciousness requires infinite, unique existence. To define perception employing a unique definition for consciousness that requires infinite existence in order to truly exist. This unique definition for consciousness states that consciousness cannot reside within the limited confines of this finite reality as it has been misunderstood to be, and as such, has evaded being properly defined. Finding this definition was the hope of the founders of Quantum Physics in order to complete a model that describes a universe interdependent on our existence. This is not an ideological argument or exploration. This book very strongly disagrees with most everything written to date, and will bring about contention.

Editorial Review

About the Author

I am a Physicist and Chemist by education. I have been working as a Physicist and Pharmaceutical Research Chemist for over twenty years now. Most of this research and work has been conducted under highly regulated FDA, Good Manufacturing Practices, Good Laboratory Practice, and even Nuclear Regulatory Agency environments with strict controls. My areas in Industrial Pharmaceutical Research include neuroscience, neuropsychopharmacology, Drug Metabolism and Pharmacokinetics, Isotopic (atomic) incorporation of stable and unstable atomic isotopes into biologically active compounds as well as biologically active peptides and proteins, peptide chemistry, protein chemistry, biochemistry, analysis and structural confirmation of biological materials, analysis and structural confirmation of small molecules, analysis, structural confirmation and isotopic incorporation of biologically active compounds, theory, operation, and design of Mass Spectrometry, Nuclear Magnetic Resonance, and Positron Emission technologies, theory, principle, and design of radio frequency and Near Field Effect photon and virtual photon emission and re-absorption, virtual particle production and annihilation, Quantum Electro Dynamic Vacuum Effects; The ancillary knowledge and experience to perform these tasks is too vast to list. I have worked for organizations such as SmithKline Beecham Pharmaceutical Research, Merck Research Labs, served as a consultant for the Central Intelligence Agency (contractor), served as a consultant to the Transportation Security Administration, served as a consultant to the Department of Homeland Security, Johnson & Johnson R&D, consulted for a number of small research firms on the topics of Mass Spectrometry, Magnetic Resonance Imaging, Applications Neuroscience, Isotopic Labeling and Detection, and a number of subjects ancillary to both Physics and Pharmaceutical Research. I am first and foremost a Physicist, and I deal primarily with Quantum Physics. I have worked for the past twenty some odd years as a Pharmaceutical Research Chemist, specializing primarily in neuroscience. My background in Physics and Science including all of the biological and cognitive sciences is quite extensive. I have, myself, experienced numerous NDEs, which are briefly discussed but not described in the book. I chose not to write about the ineffable, but about that which you can see with your own eyes.

Users Review

From reader reviews:

George Carter:

This Quantum Physics, Near Death Experiences, Eternal Consciousness, Religion, and the Human Soul are reliable for you who want to be described as a successful person, why. The reason of this Quantum Physics, Near Death Experiences, Eternal Consciousness, Religion, and the Human Soul can be one of many great books you must have is definitely giving you more than just simple looking at food but feed you actually with information that possibly will shock your previous knowledge. This book is usually handy, you can bring it all over the place and whenever your conditions in e-book and printed types. Beside that this Quantum Physics, Near Death Experiences, Eternal Consciousness, Religion, and the Human Soul forcing you to have an enormous of experience for instance rich vocabulary, giving you test of critical thinking that we all know it useful in your day activity. So , let's have it and luxuriate in reading.

Spencer Fuentes:

The book Quantum Physics, Near Death Experiences, Eternal Consciousness, Religion, and the Human Soul has a lot details on it. So when you check out this book you can get a lot of benefit. The book was compiled by the very famous author. This articles author makes some research previous to write this book. This particular book very easy to read you can find the point easily after scanning this book.

Richard Hunt:

People live in this new day time of lifestyle always make an effort to and must have the time or they will get large amount of stress from both day to day life and work. So , once we ask do people have extra time, we will say absolutely of course. People is human not really a huge robot. Then we consult again, what kind of activity do you have when the spare time coming to anyone of course your answer will probably unlimited right. Then do you ever try this one, reading publications. It can be your alternative within spending your spare time, the particular book you have read will be Quantum Physics, Near Death Experiences, Eternal Consciousness, Religion, and the Human Soul.

Linda Justice:

Is it anyone who having spare time then spend it whole day through watching television programs or just lying down on the bed? Do you need something totally new? This Quantum Physics, Near Death Experiences, Eternal Consciousness, Religion, and the Human Soul can be the reply, oh how comes? A fresh book you know. You are therefore out of date, spending your extra time by reading in this completely new era is common not a geek activity. So what these guides have than the others?
