# Mastering JBoss Enterprise Application Platform 7

By Francesco Marchioni, Luigi Fugaro

Mastering JBoss Enterprise Application Platform 7 By Francesco Marchioni, Luigi Fugaro

Create modular scalable enterprise-grade applications with JBoss Enterprise Application Platform 7

About This Book

- Leverage the power of JBoss EAP 7 along with Java EE 7 to create professional enterprise grade applications.
- Get you applications cloud ready and make them highly scalable using this advanced guide.
- Become a pro Java Developer and move ahead of the crowd with this advanced practical guide.

Who This Book Is For

The ideal target audience for this book is Java System Administrators who already have some experience with JBoss EAP and who now want explore in depth creating Enterprise grade apps with the latest JBoss EAP version.

What You Will Learn

- Configure services using the Command Line Interface
- Deliver fault tolerant server configurations
- Harden the application server with advanced techniques
- Expand the application server's horizon with tools such as like Docker/OpenShift
- Create enterprise ready configurations using clustering techniques.
- Deliver advanced security solutions and learn how to troubleshoot common network/performance issues

In Detail

The JBoss Enterprise Application Platform (EAP) has been one of the most popular tools for Java developers to create modular, cloud-ready, and modern applications. It has achieved a reputation for architectural excellence and technical savvy, making it a solid and efficient environment for delivering your applications.

The book will first introduce application server configuration and the management instruments that can be used to control the application server. Next, the focus will shift to enterprise solutions such as clustering, load balancing, and data caching; this will be the core of the book. We will also discuss services provided by the application server, such as database connectivity and logging. We focus on real-world example configurations and how to avoid common mistakes. Finally, we will implement the knowledge gained so far in terms of Docker containers and cloud availability using RedHat's OpenShift.

Style and approach

If you are a Java developer who wants to level-up to modern day Java web development with the latest Java EE 7 and JBoss EAP 7, this book is the ideal solution for you. It addresses (in a clear and simple way) proof-of-concept scenarios such as clustering and cloud and container configurations, and explains how to solve common issues.

Editorial Review

About the Author
Francesco Marchioni Francesco Marchioni is a Red Hat Certified JBoss Administrator (RHCJA) and Sun Certified Enterprise Architect working at Red Hat in Rome, Italy. He started learning Java in 1997, and since then he has followed the path to the newest Application Program Interfaces released by Sun. In 2000, he joined the JBoss community when the application server was running the 2.X release. He has spent years as a software consultant, where he has envisioned many successful software migrations from vendor platforms to open source products, such as JBoss AS, fulfilling the tight budget requirements of current times. Over the last 10 years, he has authored many technical articles for OReilly Media and ran an IT portal focused on JBoss products (http://www.mastertheboss.com). He has authored multiple books for Packt Publishing such as JBoss AS 5 Development (http://www.packtpub.com/jboss-as-5-development/book), JBoss AS 5 Performance Tuning http://www.packtpub.com/jboss-5-performance-tuning/book), JBoss AS 7 Configuration Deployment Administration (http://www.packtpub.com/jboss-as-7-configuration-deployment-administration/book), JBoss 7 Development (https://www.packtpub.com/application-development/jboss-7-development), and MongoDB Java Developers (https://www.packtpub.com/application-development/mongodb-java-developers).

Luigi Fugaro Luigi Fugaro had his first encounter with computers back in the early 80s when he was still a kid. He started with a Commodore Vic-20, passing through a Sinclair, a Commodore 64, and an Atari ST 1040, where he spent days and nights giving breath mints to Otis. Then he took a big jump to a 486DX2 66MHz and started programming in Pascal and Basic. In 1998, he started his career as a webmaster doing HTML, JavaScript, Applets, and some graphics with Paint Shop Pro. He then switched to Delphi, Visual Basic, and finally, started working on Java projects. While working on Java, he met a lot of people who helped him get more and more hard and soft skills. Luigi has been developing in Java, all kinds of web applications, dealing with both backend and frontend frameworks, for various system integrators. During his years in Red Hat, Luigi met extraordinary people, both for personal and professional reasons, who believed in him and helped him in his carrier. He is still working with Red Hat, where he can count on a wide group of highly talented people who help him daily. He would like to mention all of them, but a few of them need special recognition: Ugo, Grande Marinelli, Nonno, Mr. Bernacchi, Frank, 3A, Vocal, eljeko, Scardy, Rinaldo (don't mind the order). He has authored WildFly Cookbook by Packt Publishing.

Users Review

From reader reviews:

Jack Rosa:

Book is to be different for every single grade. Book for children till adult are different content. To be sure that book is very important for all of us. The book Mastering JBoss Enterprise Application Platform 7 has been making you to know about other understanding and of course you can take more information. It is rather advantages for you. The publication Mastering JBoss Enterprise Application Platform 7 is not only giving you far more new information but also to get your friend when you feel bored. You can spend your own personal spend time to read your book. Try to make relationship using the book Mastering JBoss Enterprise Application Platform 7. You never sense lose out for everything in the event you read some books.

Della Francis:

Your reading 6th sense will not betray an individual, why because this Mastering JBoss Enterprise Application Platform 7 publication written by well-known writer whose to say well how to make book that could be understand by anyone who else read the book. Written within good manner for you, dripping every ideas and writing skill only for eliminate your current hunger then you still skepticism Mastering JBoss Enterprise Application Platform 7 as good book not simply by the cover but also through the content. This is one e-book that can break don't evaluate book by its cover, so do you still needing one more sixth sense to pick that!? Oh come on your looking at sixth sense already told you so why you have to listening to another sixth sense.

Wanda Pence:

Reading a book being new life style in this year; every people loves to go through a book. When you study a book you can get a lots of benefit. When you read ebooks, you can improve your knowledge, simply because book has a lot of information onto it. The information that you will get depend on what sorts of book that you have read. If you wish to get information about your analysis, you can read education books, but if you want to entertain yourself read a fiction books, these kinds of us novel, comics, and also soon. The Mastering JBoss Enterprise Application Platform 7 will give you new experience in examining a book.

Jeff Jones:

As we know that book is essential thing to add our information for everything. By a reserve we can know everything we want. A book is a group of written, printed, illustrated or perhaps blank sheet. Every year seemed to be exactly added. This publication Mastering JBoss Enterprise Application Platform 7 was filled in relation to science. Spend your free time to add your knowledge about your scientific research competence. Some people has diverse feel when they reading any book. If you know how big benefit of a book, you can really feel enjoy to read a e-book. In the modern era like right now, many ways to get book which you wanted.
