Multiple Perspectives on Mathematics Teaching and Learning (International Perspectives on Mathematics Education) By Jo Boaler

Multiple Perspectives on Mathematics Teaching and Learning offers a collection of chapters that take a new look at mathematics education. Leading authors, such as Deborah Ball, Paul Cobb, Jim Greeno, Stephen Lerman, and Michael Apple, draw from a range of perspectives in their analyses of mathematics teaching and learning. They address such practical problems as: the design of teaching and research that acknowledges the social nature of learning, maximizing the impact of teacher education programs, increasing the learning opportunities of students working in groups, and ameliorating the impact of male domination in mixed classrooms.

These practical insights are combined with important advances in theory. Several of the authors address the nature of learning and teaching, including the ways in which theories and practices of mathematics education recognize learning as simultaneously social and individual. The issues addressed include teaching practices, equity, language, assessment, group work and the broader political context of mathematics reform. The contributors variously employ sociological, anthropological, psychological, sociocultural, political, and mathematical perspectives to produce powerful analyses of mathematics teaching and learning.

About the Author

JO BOALER is Assistant Professor of mathematics education at Stanford University. She is a former secondary school teacher of mathematics. She has also worked as the deputy director of a national assessment project in the UK, researching and developing assessments for students across the country. She is author of the book *Experiencing School Mathematics*. Her research interests include mathematics teaching approaches, assessment and equity. She is currently the PI of a NSF project investigating the relationship between mathematics teaching, learning, and curriculum approach.

Users Review

From reader reviews:

Ronald Walker:

The publication untitled Multiple Perspectives on Mathematics Teaching and Learning (International Perspectives on Mathematics Education) is the reserve that recommended to you to study. You can see the quality of the book content that will be shown to a person. The language that article author use to explained their way of doing something is easily to understand. The article author was did a lot of research when write the book, hence the information that they share for your requirements is absolutely accurate. You also might get the e-book of Multiple Perspectives on Mathematics Teaching and Learning (International Perspectives on Mathematics Education) from the publisher to make you a lot more enjoy free time.

Charles Jones:

Spent a free time for you to be fun activity to accomplish! A lot of people spent their free time with their family, or their very own friends. Usually they undertaking activity like watching television, going to beach, or picnic inside park. They actually doing same every week. Do you feel it? Do you wish to something different to fill your current free time/ holiday? Can be reading a book can be option to fill your free of charge time/ holiday. The first thing you will ask may be what kinds of book that you should read. If you want to consider look for book, may be the book untitled Multiple Perspectives on Mathematics Teaching and Learning (International Perspectives on Mathematics Education) can be fine book to read. May be it might be best activity to you.

Hazel Freese:

Multiple Perspectives on Mathematics Teaching and Learning (International Perspectives on Mathematics Education) can be one of your starter books that are good idea. We recommend that straight away because this book has good vocabulary that will increase your knowledge in vocabulary, easy to understand, bit entertaining but delivering the information. The article writer giving his/her effort to set every word into pleasure arrangement in writing Multiple Perspectives on Mathematics Teaching and Learning (International Perspectives on Mathematics Education) yet doesn't forget the main place, giving the reader the hottest along with based confirm resource info that maybe you can be considered one of it. This great information could drawn you into fresh stage of crucial contemplating.

Flor Rieke:

As we know that book is very important thing to add our expertise for everything. By a publication we can know everything we want. A book is a group of written, printed, illustrated or maybe blank sheet. Every year has been exactly added. This reserve Multiple Perspectives on Mathematics Teaching and Learning (International Perspectives on Mathematics Education) was filled about science. Spend your spare time to add your knowledge about your research competence. Some people has distinct feel when they reading any book. If you know how big benefit from a book, you can truly feel enjoy to read a reserve. In the modern era like right now, many ways to get book that you just wanted.
