Spatial Light Modulator Technology: Materials, Devices, and Applications (Optical Science and Engineering) From CRC Press

This work offers comprehensive coverage of all aspects of spatial light modulators, from the various optical materials used for modulation, through the availability and characteristics of specific devices, to the main applications of SLMs and related systems. The gamut of SLMs is surveyed, including multiple-quantum-well, acousto-optical, magneto-optical, deformable-membrane, ferroelectric-liquid-crystal and smart-pixel modulators.

Editorial Review

Review

. " .the extensive bibliographies following the chapters are priceless, and they provide an invaluable resource for the researcher who wants to initiate an effort in the field. . .the book is technically sound and comprehensive. . .it would serve as an excellent reference book for the fast moving spatial light modulator field." ---Optics & Photonic News "The overall coverage of the book is excellent and well balanced. Efron has done a commendable job in bringing together well-respected expertise in the field and logically organizing the book chapters for a very diverse audience. The book is well illustrated and the subsections in each chapter make it easy to identify topics of interest from the table of contents." ---Optical Engineering

Users Review

From reader reviews:

Sun Byrd:

Why don't make it to be your habit? Right now, try to ready your time to do the important take action, like looking for your favorite publication and reading a e-book. Beside you can solve your short lived problem; you can add your knowledge by the publication entitled Spatial Light Modulator Technology: Materials, Devices, and Applications (Optical Science and Engineering). Try to make book Spatial Light Modulator Technology: Materials, Devices, and Applications (Optical Science and Engineering) as your buddy. It means that it can become your friend when you experience alone and beside that course make you smarter than ever before. Yeah, it is very fortunated for you. The book makes you more confidence because you can know every little thing by the book. So , let me make new experience as well as knowledge with this book.

Maureen Jones:

People live in this new morning of lifestyle always try to and must have the extra time or they will get lots of stress from both lifestyle and work. So , once we ask do people have spare time, we will say absolutely of course. People is human not only a robot. Then we ask again, what kind of activity do you possess when the spare time coming to anyone of course your answer will probably unlimited right. Then do you ever try this one, reading publications. It can be your alternative inside spending your spare time, the actual book you have read is usually Spatial Light Modulator Technology: Materials, Devices, and Applications (Optical Science and Engineering).

Katherine Ouellette:

Your reading sixth sense will not betray you actually, why because this Spatial Light Modulator Technology: Materials, Devices, and Applications (Optical Science and Engineering) e-book written by well-known writer whose to say well how to make book which might be understand by anyone who have read the book. Written throughout good manner for you, still dripping wet every ideas and composing skill only for eliminate your personal hunger then you still doubt Spatial Light Modulator Technology: Materials, Devices,

and Applications (Optical Science and Engineering) as good book not just by the cover but also by the content. This is one book that can break don't evaluate book by its deal with, so do you still needing a different sixth sense to pick this!?! Oh come on your studying sixth sense already said so why you have to listening to another sixth sense.

Alma Medina:

Reading a book to become new life style in this year; every people loves to go through a book. When you go through a book you can get a great deal of benefit. When you read books, you can improve your knowledge, because book has a lot of information in it. The information that you will get depend on what types of book that you have read. If you wish to get information about your analysis, you can read education books, but if you want to entertain yourself you are able to a fiction books, such us novel, comics, and also soon. The Spatial Light Modulator Technology: Materials, Devices, and Applications (Optical Science and Engineering) will give you new experience in looking at a book.
