### Spray Drying Techniques for Food Ingredient Encapsulation (Institute of Food Technologists Series) By C. Anandharamakrishnan, Padma Ishwarya S.

Spray drying is a well-established method for transforming liquid materials into dry powder form. Widely used in the food and pharmaceutical industries, this technology produces high quality powders with low moisture content, resulting in a wide range of shelf stable food and other biologically significant products. Encapsulation technology for bioactive compounds has gained momentum in the last few decades and a series of valuable food compounds, namely flavours, carotenoids and microbial cells have been successfully encapsulated using spray drying.

*Spray Drying Technique for Food Ingredient Encapsulation* provides an insight into the engineering aspects of the spray drying process in relation to the encapsulation of food ingredients, choice of wall materials, and an overview of the various food ingredients encapsulated using spray drying. The book also throws light upon the recent advancements in the field of encapsulation by spray drying, i.e., nanospray dryers for production of nanocapsules and computational fluid dynamics (CFD) modeling.

Addressing the basics of the technology and its applications, the book will be a reference for scientists, engineers and product developers in the industry.

## **Editorial Review**

From the Back Cover

Spray drying is a well-established method for transforming liquid materials into dry powder form. Widely used in the food and pharmaceutical industries, this technology produces high quality powders with low moisture content, resulting in a wide range of shelf-stable foods and other biologically significant products. Encapsulation technology for bioactive compounds has gained momentum in the last few decades, and a series of valuable food compounds – namely flavors, carotenoids and microbial cells – have been successfully encapsulated using spray drying.

Spray Drying Techniques for Food Ingredient Encapsulation provides an insight into the engineering aspects of the spray drying process in relation to the encapsulation of food ingredients, the choice of wall materials, and an overview of the various food ingredients encapsulated using spray drying. The book also throws light upon the recent advancements in the field of encapsulation by spray drying, such as nanospray dryers for production of nanocapsules and computational fluid dynamics (CFD) modeling. Addressing the basics of the technology and its applications, the book will be a reference for scientists, engineers and product developers in the industry.

About the Author

**Dr C. Anandharamakrishnan** is Principal Scientist of the Food Engineering Department, CSIR-Central Food Technological Research Institute, Mysore, India.

**Padma Ishwarya S.** is Research Fellow of the Food Engineering Department, CSIR-Central Food Technological Research Institute, Mysore, India.

## **Users Review**

**From reader reviews:**

**Cindy Searcy:**

Now a day people that Living in the era where everything reachable by connect to the internet and the resources within it can be true or not demand people to be aware of each facts they get. How many people to be smart in receiving any information nowadays? Of course the answer then is reading a book. Examining a book can help folks out of this uncertainty Information particularly this Spray Drying Techniques for Food Ingredient Encapsulation (Institute of Food Technologists Series) book because this book offers you rich facts and knowledge. Of course the info in this book hundred pct guarantees there is no doubt in it you know.

**Arthur Pascual:**

The feeling that you get from Spray Drying Techniques for Food Ingredient Encapsulation (Institute of Food Technologists Series) may be the more deep you excavating the information that hide in the words the more you get considering reading it. It does not mean that this book is hard to recognise but Spray Drying

Techniques for Food Ingredient Encapsulation (Institute of Food Technologists Series) giving you joy feeling of reading. The article writer conveys their point in particular way that can be understood through anyone who read this because the author of this guide is well-known enough. This kind of book also makes your own vocabulary increase well. So it is easy to understand then can go along with you, both in printed or e-book style are available. We propose you for having this specific Spray Drying Techniques for Food Ingredient Encapsulation (Institute of Food Technologists Series) instantly.

**George Hartzell:**

As a university student exactly feel bored to be able to reading. If their teacher questioned them to go to the library or even make summary for some reserve, they are complained. Just very little students that has reading's spirit or real their pastime. They just do what the teacher want, like asked to go to the library. They go to generally there but nothing reading really. Any students feel that reading through is not important, boring and can't see colorful photographs on there. Yeah, it is to be complicated. Book is very important for yourself. As we know that on this period, many ways to get whatever we wish. Likewise word says, ways to reach Chinese's country. Therefore , this Spray Drying Techniques for Food Ingredient Encapsulation (Institute of Food Technologists Series) can make you really feel more interested to read.

**Beth Johnson:**

Reading a e-book make you to get more knowledge from it. You can take knowledge and information from the book. Book is composed or printed or highlighted from each source in which filled update of news. On this modern era like now, many ways to get information are available for you actually. From media social such as newspaper, magazines, science e-book, encyclopedia, reference book, fresh and comic. You can add your knowledge by that book. Are you hip to spend your spare time to open your book? Or just searching for the Spray Drying Techniques for Food Ingredient Encapsulation (Institute of Food Technologists Series) when you desired it?
