## Application of GIS Technologies in Port Facilities and Operations Management By Neal T. Wright & Jaewan Yoon (Editors)

Application of GIS Technologies in Port Facilities and Operations Management discusses the recent advances in GIS (Geographic Information Systems) technologies for port professionals. This committee report identifies effective GIS techniques for the management of complex port and harbor infrastructure and discusses in-depth the capabilities, requirements, and limitations of available GIS applications. It also provides useful GIS database techniques and software integration tips, an overview and discussion of GIS data types and map projections, and several case studies focusing on facility and operations management.

##### **Francis Pilkington:**

As a college student exactly feel bored for you to reading. If their teacher expected them to go to the library or to make summary for some e-book, they are complained. Just little students that has reading's heart and soul or real their hobby. They just do what the instructor want, like asked to go to the library. They go to

there but nothing reading really. Any students feel that studying is not important, boring along with can't see colorful pics on there. Yeah, it is to get complicated. Book is very important for yourself. As we know that on this period, many ways to get whatever we really wish for. Likewise word says, ways to reach Chinese's country. So , this Application of GIS Technologies in Port Facilities and Operations Management can make you sense more interested to read.
