Big Data: Techniques and Technologies in Geoinformatics From CRC Press

Big data has always been a major challenge in geoinformatics as geospatial data come in various types and formats, new geospatial data are acquired very fast, and geospatial databases are inherently very large. And while there have been advances in hardware and software for handling big data, they often fall short of handling geospatial big data efficiently and effectively. **Big Data: Techniques and Technologies in Geoinformatics** tackles these challenges head on, integrating coverage of techniques and technologies for storing, managing, and computing geospatial big data.

Providing a perspective based on analysis of time, applications, and resources, this book familiarizes readers with geospatial applications that fall under the category of big data. It explores new trends in geospatial data collection, such as geo-crowdsourcing and advanced data collection technologies such as LiDAR point clouds. The book features a range of topics on big data techniques and technologies in geoinformatics including distributed computing, geospatial data analytics, social media, and volunteered geographic information.

With chapters contributed by experts in geoinformatics and in domains such as computing and engineering, the book provides an understanding of the challenges and issues of big data in geoinformatics applications. The book is a single collection of current and emerging techniques, technologies, and tools that are needed to collect, analyze, manage, process, and visualize geospatial big data.

Editorial Review

Users Review

From reader reviews:

Rodney Bryant:

Within other case, little individuals like to read book Big Data: Techniques and Technologies in Geoinformatics. You can choose the best book if you appreciate reading a book. Given that we know about how is important a new book Big Data: Techniques and Technologies in Geoinformatics. You can add know-how and of course you can around the world by a book. Absolutely right, mainly because from book you can realize everything! From your country until finally foreign or abroad you can be known. About simple point until wonderful thing you are able to know that. In this era, we could open a book or searching by internet device. It is called e-book. You need to use it when you feel bored to go to the library. Let's examine.

Tina Olsen:

The reason why? Because this Big Data: Techniques and Technologies in Geoinformatics is an unordinary book that the inside of the guide waiting for you to snap this but latter it will surprise you with the secret this inside. Reading this book next to it was fantastic author who have write the book in such wonderful way makes the content within easier to understand, entertaining technique but still convey the meaning entirely. So , it is good for you for not hesitating having this ever again or you going to regret it. This book will give you a lot of positive aspects than the other book possess such as help improving your expertise and your critical thinking way. So , still want to hold off having that book? If I were being you I will go to the guide store hurriedly.

Marc Starr:

Within this era which is the greater man or woman or who has ability in doing something more are more precious than other. Do you want to become one among it? It is just simple solution to have that. What you need to do is just spending your time very little but quite enough to have a look at some books. One of many books in the top list in your reading list is Big Data: Techniques and Technologies in Geoinformatics. This book which is qualified as The Hungry Hills can get you closer in getting precious person. By looking upwards and review this reserve you can get many advantages.

Esther Watson:

Reading a book make you to get more knowledge from this. You can take knowledge and information from your book. Book is composed or printed or illustrated from each source in which filled update of news. In

this modern era like currently, many ways to get information are available for an individual. From media social including newspaper, magazines, science publication, encyclopedia, reference book, new and comic. You can add your understanding by that book. Are you hip to spend your spare time to spread out your book? Or just looking for the Big Data: Techniques and Technologies in Geoinformatics when you needed it?
