By Mukesh Sharma

Software Testing 2020: Preparing for New Roles By Mukesh Sharma

Software testing is at a very important crossroad, where it is going back to the roots on certain fronts while moving inexorably forward. For instance, test automation is growing in prominence, but manual testing is becoming a niche; we are increasingly collaborating with the developers, breaking the bounds of unrealistic independence in testing, and bringing in true conscious quality. At such an important stage, it is important to take stock of the past, present, and future to define both the direction the discipline will take as well as the careers it will entail for testers.

This book looks at a range of topics covering where we are in the product development landscape today, what are the varied disciplines at play, what are the influencing factors bringing in a change in software testing, why is such change important, what did the past look like, what is current decade turning out to be like, and where are we heading. As for future, it looks at it both from near-term and long-term perspectives. It also considers whether the testing fraternity is ready to take on such changes and are empowered enough to do so, or are there gaps that need to be filled.

The book closes with perspectives from industry experts on what is in store for the software testing discipline and community in the coming years.

After reading the book, you will be confident that you can take on what is in store for testers in the coming years. You will also be positioned to help the industry move to the next level, and influence change not just amongst testers but also in the product engineering industry level as a whole.

Editorial Review

About the Author

As founder and CEO, Sharma Mukesh started QA InfoTech with a vision to provide unbiased Quality Assurance solutions for business partners worldwide. Responsible for the company's global operations, marketing, sales, and development efforts, QA InfoTech, under Mukesh's leadership, has grown to five Centers of Excellence with over 700 employees. Mukesh is an active test evangelist, spreading the word on software testing through articles, conferences, and most recently his book on a career in testing. Through his passion for excellence, keen eye for detail, and customer commitment, QA InfoTech stands apart in the exceedingly competitive software testing industry.

As senior director of engagement, Rajini Padmanaban leads engagement and relationship management for some of QA InfoTech's largest and most strategic accounts. She has more than 12 years of professional experience, primarily in the software quality assurance space. Rajini actively advocates software quality assurance through evangelistic activities including blogging on test trends, technologies and best practices, providing insights on software testing to analyst firms such as Gartner, IDC. She is also an active speaker in the Star conferences run by SQE.
