The Biblical Basis for Modern Science By Henry M. Morris

For decades, Henry Morris has been known as a defender of the Christian faith. It's an auspicious title for such a humble man, yet no one can deny that the grasp Morris has on science and faith issues is staggering.

In this updated classic, Morris walks the reader through history "real history" by showing the absurdity of evolution. From a wide variety of sciences, including astronomy, biology, chemistry, physics, and geology, Morris presents clear evidence that the Bible gives us an astonishingly accurate record of the past, present, and future.

Editorial Review

Review

A classic book that sheds the light of truth on science and the Bible. --*Roger Howerton, assistant editor, Master Books, May 31, 2002*

About the Author

Dr. Henry Morris, with his copious writings about the creation/evolution debate, has earned the title "The Father of Modern Creationism." He is a respected scientist as well, and has written a number of textbooks in his own field. He is the founder and now president emeritus of the Institute for Creation Research in California.

Users Review

From reader reviews:

John Ferguson:
