Editorial Review

Review

The concepts outlined in this absorbing book are eminently practical and have been tested in the field. Pre-Accident Investigations might well not only enhance safety but save organizations money - and potentially lives too. --The RoSPA Occupational Safety & Health Journal, December 2012

'Conklin slaughters many holy cows in this very readable book, including the notion of cause , which he rejects as simply a retrospective construct. Workers don t cause failure; what workers do is trigger a whole lot of weaknesses that exist in environments, processes, systems, job sites, and in the work or organization itself. Conklin s ideas are persuasive, challenging, crystal clear, and expressed with humility and acknowledgement of what he has learned from others. --Safeguard, July/August 2013

About the Author

Todd Conklin is a Senior Advisor at Los Alamos National Laboratory, one of the world's foremost research and development laboratories, in the human performance and safety integration program. Dr. Conklin has been working on the human performance program at Los Alamos National Laboratory for the last dozen years of his 25-year career. It is in the fortunate position where he enjoys the best of both the academic world and the world of safety in practice. Conklin holds a Ph.D. in organizational behaviour and communication from the University of New Mexico. He speaks all over the world to executives, groups and work teams who are interested in better understanding the relationships between the workers in the field and the organization's systems, processes and programs. He has brought these systems to major corporations around the world. Conklin practices these ideas not only in his own workplace, but also in event investigations at other workplaces around the world. Conklin defines safety at his workplace like this: "Safety is the ability for workers to be able to do work in a varying and unpredictable world." Conklin lives in Santa Fe, New Mexico and thinks that human performance is the most meaningful work he has ever had the opportunity to live and teach.

Users Review

From reader reviews:

Grace Seals:

Now a day individuals who Living in the era exactly where everything reachable by interact with the internet and the resources inside it can be true or not involve people to be aware of each facts they get.
