The Haskell School of Expression: Learning Functional Programming through Multimedia By Paul Hudak

Functional programming is a style of programming that emphasizes the use of functions (in contrast to object-oriented programming, which emphasizes the use of objects). It has become popular in recent years because of its simplicity, conciseness, and clarity. This book, first published in 2000, teaches functional programming as a way of thinking and problem solving, using Haskell, the most popular purely functional language. Rather than using the conventional (boring) mathematical examples commonly found in other programming language textbooks, the author uses examples drawn from multimedia applications, including graphics, animation, and computer music, thus rewarding the reader with working programs for inherently more interesting applications. Aimed at both beginning and advanced programmers, this tutorial begins with a gentle introduction to functional programming and moves rapidly on to more advanced topics. Details about programming in Haskell are presented in boxes throughout the text so they can be easily found and referred to.

Editorial Review

Review

"...a rather unusual and very interesting book for the functional programming community...The author's style is wonderful, and he is good at explaining the material...This book is unique in the field of functional programming." Computing Reviews

Users Review

From reader reviews:

Maria Macdonald:

Why don't make it to be your habit? Right now, try to prepare your time to do the important take action, like looking for your favorite guide and reading a book. Beside you can solve your long lasting problem; you can add your knowledge by the guide entitled The Haskell School of Expression: Learning Functional Programming through Multimedia. Try to the actual book The Haskell School of Expression: Learning Functional Programming through Multimedia as your close friend. It means that it can for being your friend when you truly feel alone and beside that course make you smarter than ever before. Yeah, it is very fortunated for you. The book makes you a lot more confidence because you can know every thing by the book. So , we should make new experience and knowledge with this book.

Mary McCollum:

Book is to be different for every single grade. Book for children until adult are different content. As it is known to us that book is very important usually. The book The Haskell School of Expression: Learning Functional Programming through Multimedia seemed to be making you to know about other knowledge and of course you can take more information. It doesn't matter what advantages for you. The e-book The Haskell School of Expression: Learning Functional Programming through Multimedia is not only giving you far more new information but also for being your friend when you truly feel bored. You can spend your spend time to read your publication. Try to make relationship with the book The Haskell School of Expression: Learning Functional Programming through Multimedia. You never really feel lose out for everything if you read some books.

Betty Abbott:

Nowadays reading books be a little more than want or need but also become a life style. This reading addiction give you lot of advantages. The benefits you got of course the knowledge your information inside the book that improve your knowledge and information. The knowledge you get based on what kind of reserve you read, if you want get more knowledge just go with schooling books but if you want feel happy read one having theme for entertaining including comic or novel. The actual The Haskell School of Expression: Learning Functional Programming through Multimedia is kind of guide which is giving the reader capricious experience.

Brett Nash:

The book untitled The Haskell School of Expression: Learning Functional Programming through Multimedia contain a lot of information on it. The writer explains her idea with easy means. The language is very clear and understandable all the people, so do not necessarily worry, you can easy to read that. The book was compiled by famous author. The author will take you in the new time of literary works. It is possible to read this book because you can read more your smart phone, or device, so you can read the book inside anywhere and anytime. In a situation you wish to purchase the e-book, you can open their official web-site in addition to order it. Have a nice read.
